

Dr. Steve Henderson is the Chief Data Science Officer at Digital Lantern where he leads the design and development of software systems to address large scale data analysis and decision making. Steve has served as a senior data scientist and systems engineer in the commercial and military cyber operations communities where he specializes in providing data science and data engineering solutions. This includes positions in Merck's Cyber Fusion Center, Citigroup's Global Cyber Fusion Center, USCYBERCOM, and the Software Engineering Institute at Carnegie Mellon University. Steve has recently held faculty positions at the United States Military Academy Department of Systems Engineering and in the Heinz College at Carnegie Mellon University. Steve is also a 23-year Army veteran who served as an Apache helicopter pilot and Operations Systems Analyst (ORSA) all over the world.

Dr. Henderson earned a B.S. in Computer Science from USMA, an MS in Systems Engineering from the University of Arizona (UA), and a PhD in Computer Science from Columbia University. Steve also earned a graduate certificate in Incident Response from the SANS Technology Institute and GIAC certificates in Reverse Engineering Malware (GREM), Network Forensics (GNFA), Forensics (GCFA), and Incident Handling (GCIH).
